Akshit Dayal Uttiramerur

Software Engineer

akshitdayal99@gmail.com · 774-719-8766 · linkedin.com/in/akshit-u · github.com/akrypt · akrypt.github.io

SKILLS

Next.js · Python · Java · JavaScript · TypeScript · C++ · C · C# · React · Angular · SQL · Node · Flutter · React Native · Git · HTML · CSS · Tailwind · PostgreSQL · Android · NestJS · Microservices · Jira · Ruby · Snowflake · GraphQL · AWS · GCP · CI/CD · Jest · RESTful API · iOS · Redux · Express · Linux · NoSQL · MongoDB · Supabase

EXPERIENCE

Full-Stack Developer 08/2024 – Present

FULLBEAUTY Brands · NYC, NY, USA

- Designed and shipped CurvLab, a virtual try-on that lets shoppers see a garment on a similar body type and judge the fit. Sole engineer, working with the CIO. 19% sales lift after launch.
- Resolved a memory leak that was taking the site down 3–4 times a day, for about 15 minutes each time. Found it with wrk load tests and heap snapshots, and the fix prevented daily revenue loss.
- Built a company-wide AI assistant over inventory, product, sales, and analytics data, with a custom Model Context Protocol (MCP) server for Snowflake and an in-house AI client and orchestrator.
- Make key architectural decisions for the internal and external AI tools and use AI-assisted engineering to ship them.
- Built an internal CMS so merchandisers can change site content without a code deploy.
- Migrated a legacy storefront to Next.js on the front end and NestJS on AWS for the backend.
- Added site-wide caching and cut page load time by 45%.
- Operate production services on AWS: Lambda, ECS, S3, DynamoDB, RDS, CloudWatch, X-Ray, CodePipeline, and Secrets Manager.
- Built a reusable logging system that writes structured logs to CloudWatch and uses them for custom analytics.

Full-Stack Developer 07/2023 – 08/2024

Sri Infotech Inc · Remote, NJ, USA

- Led a team that shipped an employee portal on Azure, React, Next.js, Angular, and Node.js, including the mobile layout.
- Designed the microservices architecture and APIs for the employee portal.

Software Development Engineer 01/2021 – 12/2021

BuzyGo · Hyderabad, India

- Led the customer e-commerce portal in React, Angular, AWS, and Django.
- Added unit tests before release and cut post-release defects by 30%.

Software Engineer 01/2020 – 12/2020

Xlenz · Hyderabad, India

- Designed and led the cross-platform app for an augmented-reality startup, reporting to the CEO. Built with React Native, Node.js, Flutter, Redux, and SQL.
- Added persistent sort and filter so users could narrow results without running the search again.

EDUCATION

Master of Science 01/2022 – 12/2023

New Jersey Institute of Technology · Newark, NJ, USA

- Major in Computer Science: Data Structures, Algorithms, Machine Learning, Deep Learning, Cloud Computing, DBMS. GPA: 3.8

Bachelor's in Computer Science

Jawaharlal Nehru Technological University · Hyderabad, India

PROJECTS

- **organAIze:** An AI powered daily routine scheduler. (04/2024) organaize.vercel.app
- **Ishaare:** An online game website made to make social gatherings fun. (04/2024) ishaaregame.vercel.app

- **Handpose:** Integrated a hand sign detection Machine Learning Model into a React website to detect the user's hand signs. (11/2021) akrypt.github.io/handpose
- **Toastmasters App:** Digitalized Toastmasters meetings using Android Studio for an audience of 40+ members. (07/2019) github.com/akrypt/HITAMToastmastersApp

CERTIFICATIONS AND COURSES

- Neural Networks and Deep Learning: DeepLearning.AI
- Intermediate Machine Learning: Kaggle
- Machine Learning Specialization: Coursera, by Andrew Ng

OTHERS

- Winner, Hackathon: Won 1st prize for the development of a toxic plant classifier at NJIT using Deep Learning. (11/2022)
- Mozilla Hackathon Winner: Won 1st prize for building a platform connecting the students and teachers at HITAM. (11/2019)
- Computer Science Tutor: Programming · Data Structures and Algorithms · Artificial Intelligence · Android Development
